COURSE SYLLABUS

AI for DevOps

12-Week Hands-On Azure Cohort

Beginner to Advanced · No prior experience required

✓ **Job Placement Guaranteed**

START DATE

Friday, July 24, 2026

DURATION

12 weeks · 10 to 15 hrs/week

FORMAT

Live, mentor-led + hands-on labs

PLATFORM

Microsoft Azure

WELCOME

What this program is

AI for DevOps is a live, mentor-led cohort that takes you from cloud fundamentals to advanced, AI-assisted DevOps on Microsoft Azure, all in 12 focused weeks. Every week pairs clear teaching with a real, hands-on lab, so you learn by building. You finish with a production-grade portfolio, a certificate, and guaranteed job-placement support.

Who it's for

Career-changers with no tech background, sysadmins and IT pros moving into the cloud, and developers or cloud engineers who want to add modern DevOps and AIOps to their toolkit. If you can use a computer and you're willing to practice, you belong here.

What you'll need

A laptop and internet connection, and roughly 10 to 15 hours per week. We guide you through setting up your Azure account (the free tier covers most labs). No prior cloud experience required.

Tools you'll use

Microsoft Azure · Azure CLI · Terraform & Bicep · Docker · Kubernetes (AKS) · GitHub Actions · Azure Monitor · an AI coding assistant.

Job placement, guaranteed

We support you until you're hired, with 1-on-1 mock interviews, resume & LinkedIn coaching, and direct employer connections.

OUTCOMES

What you'll be able to do

By the time you graduate, you will be able to:

- ✓ Design and deploy secure infrastructure on Microsoft Azure
- ✓ Containerize applications and run them on Azure Kubernetes (AKS)
- ✓ Monitor systems and respond to incidents using AIOps
- ✓ Ship a production-grade portfolio project
- ✓ Write reusable infrastructure as code with Terraform & Bicep
- ✓ Build CI/CD pipelines that test, scan and deploy automatically
- ✓ Use AI to accelerate your engineering, then verify its output
- ✓ Interview with confidence and land a DevOps role

THE LEARNING PATH

Four phases, twelve weeks

THE CURRICULUM

Weekly breakdown · Weeks 1 to 4

01

FOUNDATIONS

Week 1 · Cloud & Azure Foundations

YOU'LL LEARN: How the cloud works; IaaS / PaaS / SaaS; the Azure portal, CLI & Cloud Shell; regions & resource groups; billing and cost controls.

YOU'LL BUILD: Set up and secure your own Azure account with budget alerts and your first resource.

02

FOUNDATIONS

Week 2 · Linux, Networking & the CLI

YOU'LL LEARN: Linux essentials & SSH; networking basics (IP, DNS, ports, CIDR); automating tasks with Bash and the Azure CLI.

YOU'LL BUILD: Provision and configure a Linux VM with a repeatable script.

03

FOUNDATIONS

Week 3 · Compute, Storage & Networking

YOU'LL LEARN: Azure VMs & scale sets; load balancing; Blob, Disk & File storage; Virtual Networks and subnets.

YOU'LL BUILD: Deploy an autoscaling web tier on a segmented network.

04

CORE
DEVOPS

Week 4 · Identity, Access & Security

YOU'LL LEARN: Microsoft Entra ID; role-based access control & least privilege; managed identities; Key Vault; encryption.

YOU'LL BUILD: Secure an app with least-privilege access and secrets stored in Key Vault.

THE CURRICULUM

Weekly breakdown • Weeks 5 to 8

05

CORE
DEVOPS**Week 5 • Infrastructure as Code**

YOU'LL LEARN: Terraform & Bicep; declarative infrastructure; state & remote backends; reusable modules; plan & apply.

YOU'LL BUILD: Recreate your entire environment as version-controlled code.

06

CORE
DEVOPS**Week 6 • Containers & Docker**

YOU'LL LEARN: Containers vs VMs; Dockerfiles & multi-stage builds; Azure Container Registry; image scanning.

YOU'LL BUILD: Containerize an application and push a scanned image to ACR.

07

CORE
DEVOPS**Week 7 • Azure Kubernetes Service (AKS)**

YOU'LL LEARN: Kubernetes core concepts; deployments, services & ingress; AKS; autoscaling and self-healing.

YOU'LL BUILD: Deploy and scale a multi-service application on AKS.

08

CORE
DEVOPS**Week 8 • CI/CD & GitHub Actions**

YOU'LL LEARN: Pipelines (build, test, scan, deploy); GitOps; secure secretless authentication; progressive delivery.

YOU'LL BUILD: Build a pipeline that automatically deploys on every push.

THE CURRICULUM

Weekly breakdown • Weeks 9 to 12

09

AI &
AIOPS**Week 9 • AIOps & Observability**

YOU'LL LEARN: Metrics, logs & traces; Azure Monitor & Log Analytics (KQL); SLOs & alerting; incident response.

YOU'LL BUILD: Create a monitoring dashboard with alerts and an incident runbook.

10

AI &
AIOPS**Week 10 • AI-Assisted Engineering**

YOU'LL LEARN: Using AI to generate & review infrastructure code, debug failures and draft runbooks, and learn how to verify it responsibly.

YOU'LL BUILD: Build an AI-assisted automation workflow you can fully explain and defend.

11

AI &
AIOPS**Week 11 • Serverless & Data Services**

YOU'LL LEARN: Azure Functions & event-driven design; API Management; Azure SQL & Cosmos DB; caching & backups.

YOU'LL BUILD: Ship a serverless API backed by a managed database.

12

JOB-
READY**Week 12 • Capstone & Career Prep**

YOU'LL LEARN: Well-Architected review; cost optimization; portfolio polish; interview, resume & LinkedIn preparation.

YOU'LL BUILD: Complete your capstone project and finish job-ready with a portfolio and interview practice.

HOW YOU'LL LEARN

Learn by building, every week

**Live, mentor-led sessions**

Small cohort with real instructors and weekly Q&A , you never learn alone.

**Hands-on Azure labs**

Every week you build on real Azure infrastructure, not slides or quizzes.

**AI as your co-engineer**

Use AI to write, debug and ship faster, then learn to verify and own every line.

**A real capstone project**

Graduate with a production-grade build that proves your skills to employers.

How you're assessed

Weekly hands-on labs (working infrastructure), portfolio deliverables, a mid-program checkpoint, and a final capstone project and presentation.

Certificate & certifications

Earn a Certificate of Completion. The curriculum is aligned to Microsoft **AZ-104** (Azure Administrator) and **AZ-400** (DevOps Engineer Expert).

CAREER SUPPORT

Guaranteed job placement assistance

We don't just train you. We work with you until you're hired.

- ✓ **1-on-1 mock interviews.** Technical and behavioral practice with real, actionable feedback.
- ✓ **Resume & LinkedIn.** Optimized to pass screening and attract recruiters.
- ✓ **Employer connections.** Direct introductions to our hiring network.
- ✓ **Offer & salary coaching.** Negotiate with confidence and maximize your offer.
